F L E X A

The Flexa High Back Ergonomic Executive Chair is designed for professionals who need flexibility, comfort, and continuous support during long working hours.

Its high-back structure combined with a 2D adjustable headrest helps maintain proper posture by supporting the neck and upper back.

Equipped with a synchronized tilt mechanism and enhanced with a Magnaflux support system, the chair moves naturally with your body, reducing strain during extended sitting.

The 3D adjustable armrests allow personalized positioning, improving comfort during typing and desk work.

A breathable striped mesh backrest promotes airflow, while the cushioned seat ensures balanced support.

Built with a durable nylon base, smooth PU castors, and a Class 4 gas lift, the Flexa chair delivers reliable performance for modern workspAces.
