Fabric seat, moulded foam

MECHANISM
Weight-sensing tilt with seat slide

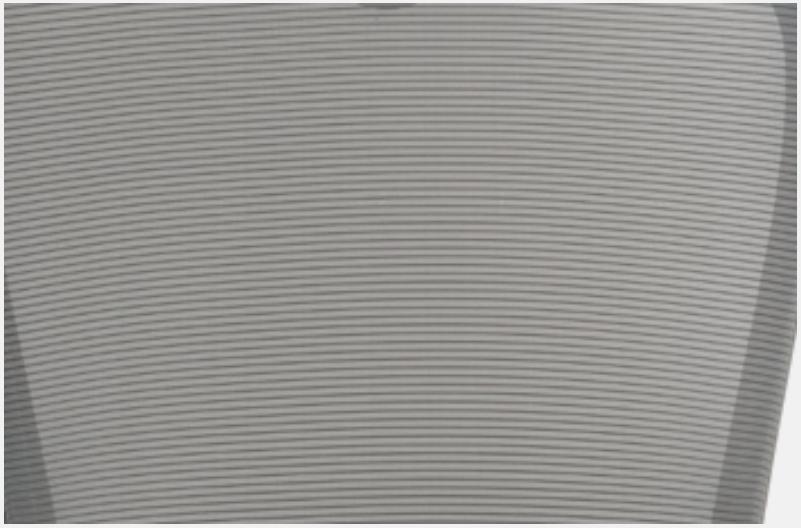

GAS LIFT
Class 4 gas lift

BASE
350mm nylon base

CASTORS
60mm silent PU castors

Built Around Your Back.

Two features that set the VEXON 1 PRO apart.

01 Wintex Mesh Back

Branded Wintex performance mesh, stretched under even tension across the PA frame. The open weave keeps air moving, and the mesh springs back to shape after load.

- **Breathable for long working hours**
- **Holds its tension and shape**
- **Fine horizontal-rib knit finish**

02 Dynamic Lumbar Support

A cushioned lumbar pad sits behind the mesh and moves with your back as you shift and recline. Slide it up or down to set support where your lower back needs it.

- **Height-adjustable on twin rails**
- **Cushioned pad, not a bare flexor**
- **Follows the back as you move**
